Manager Commentary

Market Overview

Globally equity markets experienced a strong second quarter, led by significant gains in semiconductors, memory, AI Infrastructure, and microcap stocks as the market embraced the continued acceleration in AI investment. Market conditions remained very narrow for most of the quarter, with a large divergence in equity returns across the SMID universe. Strong gains in AI related stocks were in sharp contrast to the selloff in shares negatively exposed to rising commodity prices, rising interest rates, and stocks perceived as net losers from AI adoption and implementation.

Oil prices began to fall late in the quarter, which led to a rapid decline in future inflation expectations. This led to a rally in the 10-year U.S. treasury, a narrowing of term premium, and a broadening in the equity market rally. As we begin the third quarter, headline inflation is set to decline rapidly, while core inflation across the G7 and China is set to firm. The European Central Bank and Bank of Japan raised interest rates in June; however, we do not anticipate any material increases or decreases in interest rates in the United States over the next several quarters. On a quarterly sequential basis, economic growth should begin to slow in the third quarter, while remaining strongly positive.

Across global markets, we continue to observe a meaningful divergence in capital allocation behavior. Companies investing with a long-term focus on durable returns are increasingly distinguishing themselves from those reacting to short-term pressures, particularly as industry leadership evolves amid technological innovation, the energy transition, and shifting policy dynamics. Against this backdrop, we remain active in using periods of volatility to selectively initiate or add to positions with compelling long-term upside potential.

Portfolio Positioning

As a result of buys and sells and market action, the portfolio is overweight Industrials, Materials, Financials, Consumer Discretionary, and Utilities while underweight Information Technology, Health Care, Real Estate, Communication Services, Consumer Staples, and Energy.

Contributors to Performance

During the quarter, the portfolio experienced positive absolute and negative relative performance. Positive relative performance was driven by Materials, Consumer Staples, Communication Services, Consumer Discretionary, Real Estate, and Health Care. Detractors for the quarter were Information Technology, Financials, Industrials, and Utilities.

"We believe investing is about **offsetting future obligations**, not just having market exposure."

NOTES:

COMPOSITE DESCRIPTION. This composite is comprised of all fee paying, discretionary Global SMID portfolios in excess of \$1 million under management. Global SMID is defined as a company within the market capitalization range of the MSCI ACWI SMID Cap Net Index at the time of initial purchase. The benchmark is the MSCI ACWI SMID Cap Index. The index is a free-float-adjusted market capitalization index that is designed to measure small and mid cap equity market performance across 23 Developed and 26 Emerging Markets, as defined by MSCI. The index is reported net-of-dividends, which indicates dividends are reinvested after the deduction for withholding taxes, using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. MSCI is the source and owner of MSCI Index data contained herein. Any further dissemination of the data is strictly prohibited. MSCI is not responsible for any inaccuracy in this presentation. The composite creation and inception date is 6/30/20. **FIRM DEFINITION.** Vaughan Nelson Investment Management ("Vaughan Nelson") is an equity, fixed-income and balanced portfolio investment manager. Vaughan Nelson is defined as an independent investment advisory firm and is affiliated with Natixis Investment Managers, LLC. **FEES.** Global SMID Cap Fee Schedule: .90% on the first \$10 million, .85% on the next \$15 million, .80% on the next \$25 million, .75% on the next \$50 million, .65% on amounts over \$100 million. **OTHER NOTES.** Performance results are presented before management fees. Results for the full historical period are time-weighted. Accounts have been valued daily and portfolio returns have been weighted by using beginning-of-month market values plus daily weighted cash flow. The dispersion calculation is based on a dollar-weighted average of gross portfolio returns within the composite for the entire period. The dispersion percent of N/A indicates that the number of portfolios for the entire year were equal to five or fewer or periods of less than one year. The benchmark source is FactSet. The valuation source is Intercontinental Exchange (ICE). Benchmark returns are not covered by the report of independent verifiers.

DISCLOSURES:

BASIS OF PRESENTATION. The attached information and index performance has been developed internally and/or obtained from sources, which Vaughan Nelson believes to be reliable; however, Vaughan Nelson does not guarantee the accuracy, adequacy or completeness of such information, nor does it guarantee the appropriateness of any strategy referred to for any particular investor. This document is provided for informational purposes only and should not be construed as advice or a recommendation for purchase or sale of securities. Past performance is not indicative of future results. The strategy is managed by James Eisenman, Marco Priani, Kevin Ross, and Chris Wallis from 6/30/20 to 6/30/25. **COMPOSITE NOTES.** The composite for each investment strategy has specific criteria in terms of minimum portfolio size, tax status, and discretion. Portfolios meeting the stated criteria are added to the composite as of the first full quarter of investment in that composite's style. Similarly, accounts are removed from the composite after the last full quarter of management under the composite style. A list of all composites and pooled fund investment strategies offered by the firm, with a description of each strategy, is available upon request. The composite results portrayed reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. The U.S. dollar is the currency used to express performance. The three-year annualized standard deviation measures the variability of the composite (using gross-of-fee returns, and the benchmark returns over the preceding 36-month period). **CALCULATION METHODOLOGY.** The composite performance results are time-weighted total returns net of commissions and transaction costs. Valuations and returns are expressed in U.S. dollars. Vaughan Nelson consistently values all portfolios each month on a trade date basis. Additional information regarding policies for valuing portfolios, calculating performance and preparing GIPS Reports are available upon request. Net-of-fee returns are calculated utilizing the highest annual fee paid by a client in the strategy. This fee is divided by 12 and subtracted from the gross composite return on a monthly basis to calculate monthly net-of-fee returns. Quarterly and annual net-of-fee returns are calculated by geometrically linking these monthly returns. **COMPLIANT STATEMENT.** Vaughan Nelson claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® Standards. Vaughan Nelson has been independently verified for the periods 12/31/97 through 9/30/25. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Global SMID Cap composite has had a performance examination for the periods 6/30/20 to 12/31/24. The verification and performance examination reports are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Model year-end portfolio totals were as follows: 2025 - \$2.9 billion, 2024 - \$3.0 billion, 2023 - \$2.5 billion, 2022 - \$1.8 billion, 2021 - \$2.0 billion, 2020 - \$1.4 billion.

* Partial year return. Inception date of 6/30/20.

** Number includes assets where Vaughan Nelson Investment Management does not have full unconditional trading authority. The assets consist of model portfolio relationships with third-party platforms and totaled \$2.9 billion as of 6/30/26. This information is supplemental to the Global SMID Cap GIPS Report.
