Manager Commentary

Market Overview

The fourth quarter saw strong equity market returns with the MSCI EM SMID Cap Net Index returning 8.98%. Improving supply chains, rising employment participation rates, and the lagging influence of stabilized home prices and rental inflation continue to promote disinflationary conditions. Declining inflationary pressures, combined with stable economic growth, produced a material improvement in financial conditions as the market discounted future Fed rate cuts without any corresponding decrease in earnings expectations or economic weakness. The resulting decline in interest rates led to a powerful fourth quarter rally in equity and fixed income markets.

Hong Kong (-2.3%) and China (-0.7%) were notable laggards during the quarter as the market remains concerned about the slowdown in the real estate sector. Manufacturing activity is hovering around 50 according to recent PMI monthly reports. The lack of significant policy stimulus, both monetary and fiscal, is a headwind for these markets relative to their peers despite depressed valuation, flows, and sentiment.

Turning to portfolio activities, the quarter saw the addition of eight new companies and eight exits. The additions include companies tied to cyclical recovery in U.S. housing and the semiconductor/memory markets in Asia. We reduced our exposure to several EV supply chain companies as demand was weaker than anticipated and pricing pressures persisting into 2024 negatively impact margins. We also sold two Hong Kong/China positions as we do not anticipate a strong macro recovery in the short-term.

As we enter 2024, we expect modest economic weakness in the first half of 2024 followed by economic stability and an improvement in growth heading into the second half of the year. Inflationary pressures will likely remain above the Federal Reserve's 2% target, and, with the recent dramatic easing in financial conditions, we will be monitoring the inflation situation for any signs of a reacceleration which could dent the trajectory of economic recovery.

Portfolio Positioning

As a result of buys and sells and market action, the portfolio is overweight Consumer Discretionary, Information Technology, and Real Estate while underweight Financials, Health Care, Industrials, Materials, Utilities, Consumer Staples, Communication Services, and Energy.

Contributors to Performance

During the quarter, the portfolio experienced positive absolute and negative relative performance. Positive relative performance from Materials, Real Estate, Industrials, Health Care, and Financials was offset by underperformance in Communication Services, Information Technology, Consumer Staples, Energy, Utilities, and Consumer Discretionary.

BASIS OF PRESENTATION. The attached information and index performance has been developed internally and/or obtained from sources, which Vaughan Nelson believes to be reliable; however, Vaughan Nelson does not guarantee the accuracy, adequacy or completeness of such information, nor does it guarantee the appropriateness of any strategy referred to for any particular investor. This document is provided for informational purposes only and should not be construed as advice or a recommendation for purchase or sale of securities. Past performance is not indicative of future results. The strategy is managed by Marco Priani and Kevin Ross from 11/30/2013. Performance prior to 10/1/19 was generated by Messrs. Priani and Ross while employed by Advisory Research Inc. **COMPOSITE NOTES.** Effective 10/1/19, the composite for each investment strategy has specific criteria in terms of minimum portfolio size, tax status, and discretion. Portfolios meeting the stated criteria are added to the composite as of the first full quarter of investment in that composite's style. Similarly, accounts are removed from the composite after the last full quarter of management under the composite style. A list of all composites and pooled portfolio investment strategies offered by the firm, with a description of each strategy, is available upon request. The composite results portrayed reflect the reinvestment of dividends, capital gains, and other earnings when appropriate. The U.S. dollar is the currency used to express performance. CALCULATION METHODOLOGY. The composite performance results are time-weighted total returns net of commissions and transaction costs. Valuations and returns are expressed in U.S. dollars. Vaughan Nelson consistently values all portfolios each month on a trade date basis. Additional information regarding policies for valuing portfolios, calculating performance, and preparing GIPS Reports are available upon request. Net-of-fee returns are calculated utilizing the highest annual fee paid by a client in the strategy. This fee is divided by 12 and subtracted from the gross composite return on a monthly basis to calculate monthly net-of-fee returns. Quarterly and annual net-of-fee returns are calculated by geometrically linking these monthly returns. **COMPLIANT STATEMENT.** Vaughan Nelson claims compliance with the Global investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Vaughan Nelson has been independently verified for the periods 12/31/97 through 9/30/23. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled portfolio maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Global SMID Cap composite has had a performance examination for the periods 11/30/13 to 12/31/22. The verification and performance examination reports are available upon request.
